

RBEESOLAR SOLUTIONS

PRODUCTION, CONSUMPTION
AND SELF-CONSUMPTION MONITORING

PRODUCTION MONITORING

Control your production

- · Monitor your production on a daily basis
- Check the performance of your systems
- · Automatic monthly reports by e-mail
- Failure alerts
- · Web and mobile interfaces for producers and installers

iOS and Android application

SELF-CONSUMPTION MONITORING

All the benefits of the production monitoring solution, plus consumption monitoring!

Monitor:

- The performance of the photovoltaic system
- Self-consumption, re-injected power and mains network consumption
- The total electricity consumption of the residence
- Consumption of key systems (heating, domestic hot water, etc.)
- The sources of savings

Connected meters Single- and three-phase

MK7C

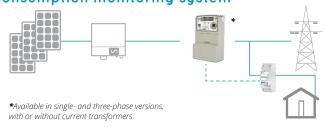

Sub-meters

BUILT-IN INTERNET CONNECTION
PLUG & PLAY, INSTALLATION IN 10 MINUTES,
5-YEARS METER WARRANTY
MID-CERTIFIED METER

Production monitoring system

Self-consumption monitoring system

PRODUCTION MONITORING BY ANALYSING SATELLITE IMAGES

Rbee Solar **analyses sunshine data using satellites** for every photovoltaic system. Actual production is compared with the production forecasts hour by hour to calculate **a performance ratio.**

Check that your system is functioning correctly any time!
